DETAILED ACTION

1. This application contains claims directed to the following patentably distinct species:

Applicant must first choose between Groups I-III

Group I) the exposure of the interior razor blades is substantially the same

Group II) the overall exposure of each blade decreases

Group III) the overall exposure of each blade increases

If Group I is selected, further election is required based on:

- a) the overall exposure of the first razorblade is positive
- b) the overall exposure of the first razorblade is negative
- c) the overall exposure of the first razorblade is neutral

If Group II is selected, further election is required based on:

- a) the overall exposure of each blade is negative
- b) the overall exposure of each blade is positive
- c) the overall exposure of the first blade is positive, and the overall exposure of the last blade is negative

Regardless of which Group I-III is selected, further election is required based on:

- d) the overall exposure of the last razor blade is positive
- e) the overall exposure of the last razor blade is neutral
- f) the overall exposure of the last razor blade is negative

Applicant must note that claim 26 will not be examined if part a) of Group II is elected.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
MPEP § 809.02(a).

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward F. Landrum whose telephone number is 571-272-5567. The examiner can normally be reached on Monday-Friday 8-4:30.
